

Errata: Two-Stage Estimation of Nonrecursive Choice Models

R. Michael Alvarez and Garrett Glasgow

In “Two-Stage Estimation of Nonrecursive Choice Models” (*Political Analysis* 8(2): 147-165) the formula for the Achen standard error correction on page 150 is incorrect. The corrected sentence with this formula reads:

“Then each standard error in the second-stage continuous equation should be multiplied by $\sqrt{\sigma_{\varepsilon U}^2/\sigma_{\varepsilon P}^2}$.”

We are grateful to Antoine Yoshinaka for pointing out this error.
