Office hours: Tues, 2-4 pm

International Political Economy

Description

This seminar is intended to provide a systematic introduction to the political economy of international relations. Readings and writing assignments are designed to explore the usefulness of alternative analytical and theoretical perspectives in addressing the central questions of actor behavior and system governance in the world economy. The aim throughout the course is to encourage students to read and think critically when addressing the literature of International Political Economy.

Students should be aware that there are many versions of the field of study variously known as International Political Economy (IPE) or Global Political Economy (GPE). In this seminar we concentrate primarily on the version of the field that has developed as a sub-specialty of the discipline of political science in the United States – now typically referred to as the American school of IPE. Other versions of the field are explored in a companion seminar (PS 270), which is offered at another time.

Readings

There is no single textbook for this seminar. Rather, readings are assigned from a variety of published sources. For each week, readings are divided into two groups. The first group each week is required and can be accessed via GauchoSpace. These readings are by no means comprehensive but may be regarded as representative of broader themes in the literature. The second group identifies additional readings that are recommended if you wish to pursue selected topics in greater detail.

Course requirements

Students will be required to attend all sessions of the seminar, to do all the reading for each week as assigned, and to participate fully and constructively in class discussions. Any absence must be justified by a valid excuse.

In addition, students will be required to write three (3) brief critical reviews of selections of the assigned readings, as follows:

Paper no. 1. A review of the readings assigned for one of the following two weeks: October 4 or October 11. **Due October 18.**

Paper no. 2. A review of the readings assigned for one of the following three weeks: October 18, October 25, or November 1. **Due November 8.**

Paper no. 3. A review of the readings assigned for one of the following four weeks: November 8, November 15, November 22, or November 29. **Due December 6.**

Each of the three papers should be at least 5 pages in length. In each paper, you will be expected to identify three or more common themes in the assigned readings and compare and evaluate what the readings have to say on each theme. The themes do not need to be addressed by every one of the week's assigned readings but, in each case, should be addressed by a minimum of two of the readings. The choice of themes is up to you. Themes may be as broad as (e.g.) the overall role of interests, institutions or ideas in shaping some form of state behavior or as narrow as (e.g.) the specification of a single variable or issue.

The aim of each paper is to help develop your ability to read *critically*. The format is *comparative analysis*, not mere description. The emphasis is on reasoned judgment. It is not enough simply to recapitulate what each reading has to say about a given theme. You must *compare and contrast* what they have to say, evaluating strengths and weaknesses, and offer some conclusion of your own. What do we learn about each theme from the readings? Which reading or readings seem to provide the best insight? What remains to be learned?

Thus each paper should include the following:

– A very brief summary of each selected reading, with an emphasis on key arguments and conclusions. Avoid excessive detail. Stick to the main points.

– A brief summary of each common theme to be discussed in your paper. What are the issues involved and why are they important?

– A comparative evaluation of what the selections have to say about each theme. What do we learn from these discussions, and what remains to be learned?

Background reading

For concise introductions to the field of IPE, you might try two books of my own:

Benjamin J. Cohen (2008), *International Political Economy: An Intellectual History*.

Benjamin J. Cohen (2014), *Advanced Introduction to International Political Economy*.

For students inspired to read beyond the sample of writings assigned or suggested for this course, most of which are quite recent in origin, a number of classics in the US version of the field of International Political Economy may be recommended, as follows:

David A. Baldwin (1985), *Economic Statecraft*.

Robert Gilpin, *Global Political Economy* (2001). [This is an updated version of Gilpin, *The Political Economy of International Relations*, 1987.]

Albert O. Hirschman (1945/1969), *National Power and the Structure of Foreign Trade*.

Peter J. Katzenstein (1977), *Between Power and Plenty*.

Robert O. Keohane (1984), *After Hegemony*.

Robert O. Keohane and Joseph S. Nye, *Power and Interdependence*, fourth edition (2012). [This is an updated version of the classic book originally published in 1977, with some new material on globalization.]

Charles P. Kindleberger (1973), *The World in Depression, 1929-1939*.

Stephen D. Krasner, ed. (1983), *International Regimes*.

Ronald Rogowski (1989), *Commerce and Coalitions*.

There are also a number of useful anthologies on the market, including especially:

C. Roe Goddard, Patrick Cronin, and Kishore C. Dash, eds. (2003), *International Political Economy: State-Market Relations in a Changing Global Order*, second edition.

Benjamin J. Cohen, ed. (2005), *International Political Economy*.

Richard Stubbs and Geoffrey R. D. Underhill, eds. (2006), *Political Economy and the Changing Global Order*, third edition.

Benjamin J. Cohen, ed. (2011), *International Political Economy*, four volumes.

Darel E. Paul and Abla Amawi, eds. (2013), *The Theoretical Evolution of International Political Economy*, third edition.

John Ravenhill, ed. (2014), *Global Political Economy*, fourth edition.

Finally, to see what is current in the field, you may wish to consult the top IPE journals on a regular basis. These include *International Organization*, *International Studies Quarterly*, *Review of International Political Economy*, and *World Politics*.

Course schedule

September 27	Analytical perspectives
October 4	Trade: domestic politics and institutions
October 11	Trade: international politics
October 18	Money and finance: domestic politics and institutions
October 25	Money and finance: international politics
November 1	Other topical issues
November 8	International economic governance
November 15	International security
November 22	Dynamics
November 29	Globalization

September 27. Analytical Perspectives

Benjamin Cohen (2007), "The Transatlantic Divide: Why Are American and British IPE So Different?," *Review of International Political Economy* 14:2 (May), 197-219.

Paul Cammack (2011), "Knowledge Versus Power in the Field of IPE," in Stuart Shields, Ian Bruff, and Huw Macartney, eds., *Critical International Political Economy: Dialogue, Debate and Dissensus*, 149-168.

David Lake (2009), "Open Economy Politics: A Critical Review," *Review of International Organizations* 4:3, 219-244.
